

This guide is intended for business users of the dashboard. It explains the purpose and business value of each KPI and visualization — helping you understand what to monitor, why it matters, and what questions each metric helps answer.

1. Redemption Rate

What it measures

Measures the proportion of earned points that members actually spend on rewards.

2. Points Accumulation

What it measures

Tracks the total volume of points earned by all loyalty members

3. Average Customer Lifetime Value (Avg CLV)

What it measures

Represents the average total value expected from a loyalty member over the entire duration of their relationship with the airline.

4. Flights Per Member

What it measures

Measures the average number of flights taken per loyalty member within the selected period.

5. Members by Loyalty Tier (Pie Chart)

What it measures

Shows the distribution of members across the program's loyalty tiers — Aurora, Nova, and Star.

6. Churn Rate by Gender (Bar Chart)

What it measures

Displays the percentage of members who cancelled their loyalty membership, broken down by gender.

3. Avg CLV & Total CLV by Month (Dual-Line Chart)

What it measures

Tracks both the average CLV per member and the total combined CLV of all members across each month of the year.
